

### Contract Growing Road Map

	1.	2.	3.	4.	5.	6.
	<b>Understand your vision</b>	<b>Present solutions</b>	<b>Sign Contract</b>	<b>Propagate crop</b>	<b>Crop Update</b>	<b>Delivery</b>
	You and Riverside identify your desired outcomes. This includes discussions, meetings and onsite visits (if needed). This generally takes between 2 - 6 weeks.	We analyse your requirements and vision and put together a formal proposal. We include alternative options and suggestions that will help you craft your best solution with Riverside.	Once the solution is agreed by both parties, then a contract is sent through to you, to sign. This is best done before August to ensure we have enough time to produce your crop. A 25% deposit is invoiced at this stage.	Riverside propagates your crop. This is done by sowing seed from our suppliers or taking and setting cuttings from our own mother plants. Propagation is best completed by November but this is dependant on the crop.	After 3 - 4 months we will send you an update of your crop, with photos and a basic summary of the crop. We welcome you to come and view it yourself, if possible. A 25% stage payment will be invoiced.	We agree on a delivery date (or dates). And the seedlings are packaged and sent accordingly. Collection is also an option. The final 50% is invoiced at this stage.
