RiversideTM 
Horticulture

Forests start here...

We have built strong relationships with seed suppliers and foresters around the country to ensure we get the best quality seed and propagation material to grow with.

Riverside Horticulture has a large covered propagation capacity of 2million seedlings.

Complex batch tracking system for every production run.

We are licenced under RPBC (Radiata Pine Breeding co) which gives us the ability to grow pines such as Attenuata from seed and cuttings.

Andrew Dartnall
Forestry Contracts Manager

Hello, I'm Andrew a 5th generation horticulturalist and shareholder here at Riverside Horticulture. I started working life in the forests of north canterbury as a tree feller and then moved into the family business to grow small plants, what we are still doing here today.

Forestry is a new product line for us but we are dedicated to moving with the industry, to supply foresters all over the country. We concentrate on specialised species and growing them from premium clones.

I'm excited about where forestry is going and we are here to support the forward thinking companies within such a vital industry.

With our 2024 production season coming to a close, we are looking to 2025 productions needs. To get ahead of the game, and ahead of the rush, get in touch now with your seedling requirements to secure stock. Especially Attenuata pines, as they are not as readily available as other species by seed or cutting.

Give me a call on 021 228 3053 to discuss what your forestry needs are for 2025 and beyond.
Cheers, Andrew.

The specs we grow to

Pinus Radiata X Attenuata

Grade: 81 Cell

RCD: 3 - 5mm

Height: 250 - 400mm

Single Leader

Grown in air-pruned, side slit cells to reduce root spiralling.

Sequoia Sempervirens

Grade: 50 Cell

RCD: 3-5mm

Height: 200 - 350mm

Single Leader

Grown in air-pruned, side slit cells to reduce root spiralling.

Eucalyptus bosistoana

Grade: 50 Cell

RCD: 3-5mm

Height: 250 - 350mm

Single Leader

Grown in air-pruned, side slit cells to reduce root spiralling.

Get in touch to ask us about specs for other forestry species or sizes.

Pricing Guide

Species	Size	Individual Price (Ex. GST)	Price per 1000 (Ex. GST)	Royalty to NZ Forest Research (per 1000)
Acacia Melanoxylon	50 Cell	\$ 1.95	\$ 1950.00	
Cytisus proliferus (Tagasaste)	50 Cell	\$1.95	\$1950.00	
Eucalyptus Bosistoana	50 Cell	\$ 2.55	\$ 2550.00	
Eucalyptus Nitens	50 Cell	\$ 1.20	\$ 1200.00	
Eucalyptus Ovata	50 Cell	\$ 1.20	\$ 1200.00	
Pinus Radiata x Atenuata	81 Cell	\$1.10	\$1100.00	\$ 52.10
Sequoia Sempervirens	50 Cell	\$ 1.95	\$ 1950.00	
Sequoia Gigantium	50 Cell	\$ 2.40	\$ 2400.00	
Podocarpus totara	50 Cell	\$2.10	\$2100.00	

- The species you want not listed above? Give Andrew a call on 021 228 3053 to see if we can grow the trees that you're after.
- This pricing chart is a guide only and individual contract pricing will be worked out after the initial discussions with you.
- Our contract growing deposit policy is 25% upfront, 25% when the crop has germinated or cuttings have set roots and the final 50% is invoiced on delivery.
